JULY

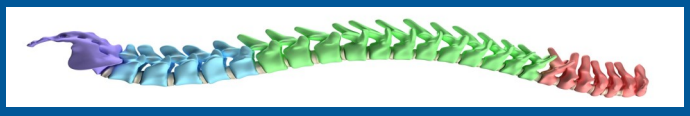
Livingston County Chiropractic and Weight Loss Center

Whole Body Medical Wellness

The greatest compliment someone can give is the referral of their loved ones. We invite YOU to help us make Livingston County the healthiest it can be by offering a complimentary 1st visit during the month of July.

Patient Appreciation Friends & Family Invitation

For the month of July, your friends and family can receive a complimentary consultation, examination, and x-rays (if necessary) to find out about the health condition of their spine.



Here's how it works: Refer them to our office and give them a patient appreciation flyer. They will bring this to their first appointment. Also, please have them mention friends & family month when they schedule.

Thank you in advance for your referral.

***Unfortunately with Federal guidelines, we are not allowed to offer any discounts to Medicare patients**

Joint Replacement VS. Regenerative Stem Cell Therapy Procedure?

Whole Body Medical Wellness in Pontiac, IL is one of the limited centers around the country to offer Stem Cell therapy to relieve osteoarthritis (OA), joint pain, meniscus tears, tendon tears plus much more. Patients can benefit from a unique non-surgical procedure using stem cell injections that will help elicit your own body's repair mechanism and growth factors to promote healing.

Stem Cell Therapy can repair tissue that is too damaged to heal on its own. Stem Cells can stimulate the formation of cartilage, tendon, ligaments, bone, and fibrous connective tissues. Stem Cells that we use in our office are from human umbilical cord that is from a healthy mom, healthy baby, and healthy birth. These concentrated stem cells are then injected into the patient's damaged tendon or joint. These injections provide a non-surgical treatment option to provide long-lasting relief from chronic joint pain.

Injuries and conditions commonly treated by Stem Cell Injections:

Achilles Tendon Injury
Plantar Fasciitis
Bicep Tendon Injury
Ligament Injuries
Osteoarthritis for hip, knee, shoulder, wrist, ankle, and feet
Rotator Cuff injuries
Sports Injuries
Tennis Elbow
Golfer's Elbow
Back Pain

Not all patients are candidates for stem cell injection therapy.

If you have an injury that is not healing and would like to avoid major surgery or if you are currently only masking pain through injection therapy or medication, stem cell therapy may be right for you. Ask one of our staff members about our upcoming informational event on August 29th at 6:30 at the Eagle Theater. You do not have to be a current patient at our office to attend this meeting. Please invite all friends and family to the event that might be able to benefit and change their lives with regenerative therapy.

One Simple Change can make a Big Difference

We know how hard eating right can be. Juice Plus nutritional products help you get more of the whole food nutrition your body.

- Not getting enough fruits and vegetables throughout the day? Juice Plus will help you "bridge the gap" between what you and your family should eat and what you do eat every day. Juice Plus is a whole food based nutrition from 20 different fruits, vegetables and grains.
